Struggling to understand why cloud adoption has failed?

Nordcloud offers a Free Health Check (FHC) service for customers who are struggling to understand why cloud adoption has failed to meet expectations in one or more areas.

Nordcloud has helped hundreds of organisations make significant cloud savings. Our free health check will help you to understand where and how you can make similar savings.

Cloud Health Check.

The FHC focuses on completing a high level assessment around three areas:

1. Cost Control
2. Governance & Enablement
3. Modernisation

PROCESS AND DELIVERABLES

Review process

The assessment is carried out through a series of customer questionnaires, a two-hour review session of the answers and a two-hour deck presentation and discussion with our experts.

Ensuring best practise

As part of the assessment, we compare the current processes and procedures in place in these areas with those based on recommendations by leading partners, industry best practices and our own experience. We grade each section using a traffic light system (red, yellow or green).

KEY VALUE

Indentify cost savings

This process will help you identify exactly how you can make both short and long term cost savings across your cloud and core infrastructure.

Indentify new opportunities

We will highlight what could be achieved by addressing every area that is currently not in the green status of the traffic light system.

Empower your team with leading expertise

The program also delivers a good overview of your overall cloud health, providing the opportunity to directly engage with the Nordcloud team, who are leading experts in Microsoft Azure and cloud skills.

We help cure cloud failure quickly – at a fraction of what you think it will cost.

Nordcloud is a European leader in cloud migration, application modernisation, development, managed services and training.

With Critical Cloud Care, you get cloud-native experts untangling issues, pre-empting new pitfalls, providing essential technical support, reducing your infrastructure spend – and helping you achieve better, more sustainable results.

Faster results

We're cloud pioneers with a 100% cloud heritage. This means we're not just jumping on bandwagons or superimposing trends on to legacy ways of working. You get better, faster results because you have cloud natives guiding your journey.

Empowered teams

Our entire approach is about empowering your teams, not creating dependencies. From technology to training, from design to DevOps, you get the support needed to capitalise on cloud benefits. That way, you're positioned to maximise the cost savings and value potential of the cloud ongoing.

Global cloud leadership

We're a leading challenger in Gartner's Magic Quadrant with the highest levels of accreditations with leading partners. You therefore get the leading advice in the industry to help drive value from cloud for your business.
