Nordcloud
an IBM Company

Platform engineering

Create an IT support model that delivers a best-in-class, automated platform for application teams and agile developers

- Looking to give agile developers self-service access to all infrastructure services for Day 1 and Day 2 requirements?
- Ready to reduce IT infrastructure costs by 20%?

How can we help?

Enhance your IT support model

To meet the needs of an agile, product-based digital organisation.

Co-deliver with professional services and managed services

To remove the gaps between vision and delivery.

Leverage cloud-native managed services

To accelerate the transition to the new operating model and upgrade automation capabilities.

Why Nordcloud?

We help you to co-design and co-staff an IT support model fit for a cutting-edge digital organisation. By helping you bring more automation into Day 1 and Day 2 operations, you streamline delivery while reducing costs. Move from reactive+tickets to automated, roadmapped, proactive and responsive platform IT.

With our technology and expertise:

- IT can better meet the needs of product teams and business units
- You maximise automation, increasing speed and reducing costs
- It's easy to leverage GenAI in IT operations

Lower IT costs. Faster delivery. More efficiency and agility. Let's get started:
